Escola Superior de Tecnologias

ABOUT ME

Hey! My name is Nuno, I'm a problem solver from Portugal and I love developing clean and well-thought designs.

As an **UX & UI Designer** I'm focused on finding user-centred solutions and designing interfaces that enhance the user experience.

I also do front-end, ui-development, branding, graphic design (web and print), final artwork, digital photography, photo retouching and manipulation and motion graphics.

I continuously invest time researching design methods & deliverables, their implementation in new product development, data and concept visualizations and the ability for design thinking. Also, I'm always on the lookout for new technologies and keeping up with industry standards. I like solving problems and finding new solutions to old ones, working with cutting edge technologies whenever possible.

I always try to keep my focus on the final goal and be as pragmatic as possible throughout the process, in order to build strong and appropriate solutions, using the most suitable methods.

EXPERIENCE

MAY 2018 - PRES.

UI / UX Designer

FEVER — www.fever.pt

Fever is a 15-year digital agency born from the perfect merge of Massive Digital Creative Agency e Tribe Engagement.

My main job is to create UX solution that reflect user needs and develop UI design systems for websites and web apps.

FEVER.

JAN 2016 - PRES.

UI / UX Designer

SOFTSTART — www.softstart.io

Softstart is a company dedicated to support the first steps of every startup, enhancing its success possibilities to the highest level.

My role is to create UX solutions through wireframes, tests, data analysis, user flows and prototyping, and work on UI design systems for websites, mobile and web apps.

softstart
